

Your Europe-wide solution for transporting coal

Reliable deliveries

Together with you, we develop needs-based programmes for every size of transport. We are geared to the changing transport flows and quantities of our customers and can flexibly adapt the transport concepts to suit changing customer requirements.

WHAT WE OFFER YOU

Security of supply thanks to an extensive fleet of locomotives and wagons adapted to different customer requirements and capable of customised, Europe-wide transport for the energy industry

Regular scheduling of supplies to and disposals from power stations in consideration of the special situation of the electricity sector/steelworks and requirements-based provisioning to reduce the need for stockpiling

Coordination of transport flows from different sources (ARA ports, North Sea ports, etc.) and multimodal logistics concepts (e.g. combination of rail and inland waterway)

Comprehensive customer support round the clock, 365 days a year and international transport monitoring and consignment tracking
